3. Precautions

Do not boot the controller while a hand or metal is on the touch panel. It may not work properly after booted.

Operation may become unstable depending on the surrounding environment.

Do not use the controller under environments that affect capacitive values (Possible affecting factor is power supply noise.).

The application tool, TPOffset must be executed in advance of the use of touch screens. TPOffset, the application software, which can be downloaded from the DMC's website shown in below. It is executable on Windows OS.
